

Features

- Low cost, hydraulic tool
- Portable 2HP 208VAC power
- Joining force can be continuously adapted from 4,500 - 11,240 lbf (20 - 50 kN)
- Suitable for medium volume applications with manual feed
- Orientation is available in horizontal and vertical planes
- Any of the C-frames available for the ESN50 battery tool are compatible with the cylinders
- Can be equipped with various tooling to set clinch studs and nuts and pierce rivets

Benefits

- Can be used in a large range of applications, from prototype builds to medium volume production
- Versatile use for riveting and pressing

Specifications

Joining force	4,500 - 11,240 lbf (20 - 50 kN) (adjustable)
Power supply	2HP 208 VAC

Placing Capability

Fastriv® self-piercing rivets
Clinch nuts and studs

The tooling required for the respective application has to be ordered separately. Please contact your local representative.

Various C-frames are available to meet the needs of specific applications.
