

An Acument™ Global Technologies Company

Avdel® Avdelok® Structural Lockbolts

Avdel® Avdelok® structural lockbolts provide high shear and tensile strength in heavy-duty engineering applications. They are available in aluminum alloy, steel, and stainless steel in a wide variety of head sizes and collar options. The permanently swaged lock between the collar and the bolt prevents loosening, and controlled clamp ensures secure, vibration-resistant joints. Diameters range from 4.88 mm to 9.6 mm for the standard Avdelok, and up to 25.4 mm for Avdelok LD. Applications include heavy-duty trucks and off-highway vehicles, shipping containers, railway cars and tracks, mining equipment, bridge and ship building, and solar power collectors. For more information, go to www.avdel-global.com, or e-mail infoavdel-usa@acument.com.
