### Avdel® Genesis® nG Handtools

Hydro-pneumatic Avdel® Genesis® NG2, nG3 and nG4 installation tools from Avdel® North America apply breakstem rivets and related fasteners in automotive, construction, aerospace, and general industrial assembly operations. Installation rates are 1.2 seconds per rivet, and pull forces vary between 2,100 lbf and 4,200 lbf. An integrated cycle counter tracks placements and alerts operators to maintenance schedules. A soft rubber grip reduces operator fatigue, and air supply shuts off automatically when the trigger is released, or when the stem collector is removed. A bearing guide controlled by a hydraulic piston reduces oil consumption, and steel tie rods remove structural loads from the body and secure air cylinder components directly to the tool head. With impact-resistant plastic bodies and heavy-duty rubber bases, Avdel® Genesis® nG handtools weigh between 4.3 and 5.0 pounds. For more information, go to [www.avdel-global.com](http://www.avdel-global.com), or e-mail [infoavdel-usa@acument.com](mailto:infoavdel-usa@acument.com).
