

An Acument™ Global Technologies Company

Avdel® Rivscrew® For Plastics

Avdel® Rivscrew® PL for plastics, a proprietary Speed Fastening® system for hard and soft plastics, applies up to 60 coarse-threaded blind fasteners per minute, six times faster than self-tapping screws and nut-screw-and-washer assemblies. Rivscrew PL installs with a hexagon mandrel that expands radially, forming threads in host material. No torque control is needed, precluding the possibility of thread stripping and debris generation during installation. A hex key removes and reinserts Rivscrew PL fasteners up to five times with no reduction in performance. High-tolerance applications include automotive interior and exterior components, consumer electronics products, and computer chassis. For more information, go to www.avdelglobal.com, or e-mail infoavdel-usa@acument.com.
